

## Services Assessment

At Johnston Park McAndrew, we provide a wide range of risk advisory services either in-house or by close business partners. We let you have full control over what services we provide by providing core services which are based upon a complete servicing of all your insurance requirements. Our supplementary services cover a range of services designed to help you manage business risks. You can choose from the service options and then be charged accordingly, rather than be charged for work that you do not require.

This Services Assessment will be updated on an on-going basis to record the services which have been discussed and your decision in each case.
